Karma Quick Start

L1 · SALES

Six things you will do every day, one page each. Ten minutes from here to your first customer visit.

This is the short guide. It covers only what a new user needs on day one. For everything else — targets, leave, Golden Hour, reports — see the full **Karma User Manual**.

FOR

New L1 sales users

APP VERSION

12.0.35 (build 14)

PLATFORMS

Android and iOS

ISSUED

September 2026

Your whole day in Karma

Almost everything you do follows this one chain. Learn these six steps and you can do the job. Everything else in Karma is extra.

1

Find the customer

Home screen → **Datapoint Search** → type the name → tap the result

2

Book the visit

In the customer record → **Call Booking** → fill three steps → **SAVE**

3

Check in when you arrive

Home → **Call Booking** card → open the visit → the pin → **Check In**

4

Check out before you leave

The same pin → **Check Out**. You cannot do step 5 without both

5

Write up what happened

In the visit → ▾ menu → **Support/Visit History** → +

6

Claim your travel

In the visit → ▾ menu → **Conveyance Entry**

THE ORDER MATTERS

Check In and Check Out must both be recorded before Karma will let you write up the visit. And the write-up must exist before your team lead can approve the call. If you skip a step, the next one is blocked.

Words you will see

Karma uses some words in its own way. These are the ones that confuse people in the first week.

Data point	A customer account. Everything for a customer starts from its record
Face Time	Hours you spent sitting in front of customers
Net Value	Business you booked in the period shown
Top 30 / Next 30	Your biggest 30 accounts, then the next 30. Others is everything else
Epicentre	A geographical area. Every account sits in one
Call / Visit	The same thing — a booked customer meeting
Call Booking	The form that creates a visit, and the list of visits you have
Support entry	The written record of what happened on a visit
Conveyance	Your travel claim. Rs. 3 per kilometre
CE	A small chip on a visit meaning a travel claim is already attached
Lead	A new sales enquiry. Received came to you, Given you passed on
Opportunity	A deal you are actively working towards an order
Outstanding	Money invoiced to a customer but not yet collected
Escalation	A formal, tracked complaint. A phone call is not an escalation
Tally serial	The customer's software licence number. Some screens need it
Allocation Manager	Who a visit is assigned to — Sales, or a support desk

THREE YOU CAN IGNORE FOR NOW

ANS and **PBL** are training records, and **Antra Golden Hour** is your coaching session with your captain. None of them are part of a normal customer day — your manager will tell you when to use them.

Sign in

The sign-in screen

1 Type your username and password

Your reporting manager gives you these. There is no sign-up screen and no forgot-password link.

2 Leave Remember Me ticked

Karma then signs you in automatically every time. You should only see this screen once.

3 Tap Log In

A welcome card shows your photo and reads your name aloud. Close it with ✕.

Say yes to both permissions

Location — check-in and check-out will not work without it.

Notifications — ticket updates and approvals arrive this way.

IF IT WILL NOT LET YOU IN

“Invalid username or password” — look for a stray space at the end of your username. If it still fails, your account may be locked. Retrying will not help; call your reporting manager.

“Cannot login in this device” — your login is tied to one handset. Your reporting manager has to release it before you can use a new phone.

ANDROID — UPDATES DO NOT COME FROM THE PLAY STORE

Karma updates itself. Check the menu (≡) → **Update App** now and then. If you see **“Please Update Your App”**, nothing loads until you do.

Your home screen

- 1 **≡ the menu** — everything that is not on this page
- 2 **Today · September · Cumulative** — these change the period for every figure below them
- 3 **Face Time and Net Value** — your hours with customers, and business booked
- 4 **Top 30 / Next 30 / Others** — how your business splits across your accounts. Tap a ring to open that list
- 5 **Four cards** — Datapoint, Call Booking, Lead and Opportunity. Each one opens its own screen
- 6 **Three buttons at the bottom** — **Datapoint Search**, **Nearby Customer** and **Cold Calling**

Pull down anywhere on the page to refresh every figure.

Where you land after signing in

THE TWO YOU WILL USE MOST

Datapoint Search at the bottom is the fastest way to any customer. The **Call Booking** card is where your visits for the day live.

IF THE HOME SCREEN SPINS FOREVER

This is almost always because your **target has not been set** for the period. Pull down to refresh once. If it still spins, ask your reporting manager to check your target — it is not a problem with your phone.

Find the customer

A **data point** is a customer account. Booking a visit, raising a lead, checking their tickets — all of it starts from their record.

The account list

One customer's record

The fast way

- 1 **Tap Datapoint Search**
At the bottom of the home screen.
- 2 **Type four letters, or the serial number**
The first four letters of the company name are enough.
- 3 **Tap the result**
It opens the customer record directly.

The other way

Tap the **Datapoint** card on the home screen for the full list, then search or filter it to **All**, **Qualified** or **Non Qualified**.

What is inside a customer record

Tiles for their address, contacts, live products, past visits, open deals, tickets and Tally serials — plus **Call**, **Email** and **Website** shortcuts in the header so you can reach them without leaving the screen.

THE ONE TILE THAT MATTERS TODAY

Call Booking — the **only** place in Karma where a new visit can be created. The home-screen card just lists visits you already have.

Book the visit

Three steps. You cannot move forward until the **required** fields on the step you are on are filled.

1 What kind of call

- **Call Date** and **Call Time** — already set to now; tap to change
- **Type of Call** **required**
- **Nature of Call** **required**
- **Allocation Manager** **required** — Sales, or a support desk

2 Who and where

- **User** **required** — who is attending. Only appears if you chose **Sales** above
- **Location** — picking one fills in the phone, address and region for you
- **Contact Person** **required** — picking one fills in their email and mobile
- **Support Type** and **Tally Serial**

3 The detail, then SAVE

- **Cheque Collection** — tick Yes if you are collecting payment
- **Remark for customer** — what the customer will see
- **Remark for Support Executive** — internal briefing for whoever attends

THREE THINGS THAT CATCH EVERYBODY

Nothing is saved until you tap SAVE. If you back out of step 1 or 2, the booking is gone.

Never type &, # or + in a remark or address. They can cut the saved record short with no error shown.

Contact Person is checked at SAVE, not at step 2. You can reach the end and still be refused with “Please select Contact Person”.

LET KARMA TIDY YOUR WRITING

Enhance Text on either remark box rewrites your note into clearer English; **Previous Remark** puts your own wording back.

Check in, and check out

Open the **Call Booking** card. Your visits sit under **Today's Call**, **Call Ahead** (future) and **Previous Call** (past). Tap today's visit.

Company Name	
Contact Person	
Gateway Installation	
Admin Email	
Account Owner	
Acc Owner No	
Customer Mobile	
Landline	
Address	Plot 11, MIDC Industrial Area, Pune
Support Type	
Call Date	01-09-2026 11:30 AM
Tally Serial No	
Call Schedule	
Remark	Scheduled product demonstration.

An open visit

1 When you arrive, tap the pin

Top of the screen. Choose **Check In** and confirm. Karma records the time and exactly where you are standing.

2 Do the visit

3 Before you leave, tap the pin again

Choose **Check Out**.

Buttons on each visit

Call and **Message** reach the customer, **Address** opens maps, **Notes** holds the visit note. The **⌵** menu has **Create Lead**, **Ticket History**, **Support/Visit History**, **Conveyance Entry** and **Product & Services**.

CHECK IN AT THE CUSTOMER, NOT IN THE CAR

Your location is captured the moment you tap. Checking in from the office, or on the way home, records the wrong place and the visit may be questioned.

TWO ERRORS YOU WILL MEET

Nothing happens when you tap Check In — location permission is off. Turn it on in phone Settings under Karma, then reopen the visit.

“You can only do check in/out for today's call” — the visit is not dated today. Only a team lead can fix it afterwards, so try not to forget.

Write it up, claim the travel

Write up the visit

Every visit needs a written entry. The approval, your travel claim and the customer's history all hang off it.

1 Open the visit

Then  → **Support/Visit History**.

2 Tap +

This opens **Add Support Entry**.

3 Fill it in and save

It asks how the visit is classified, who you met, what happened (**Remark**), what you noticed (**Observation**), what they asked for (**Requirement**) and where things stand. You can attach photos and email the entry out.

CHECK OUT FIRST

This screen will not open until **both** Check In and Check Out are recorded. Karma stops you with "CheckIn Entry is must to be add Support Entry!"

Claim your travel

Travel is always claimed **against a visit**, never on its own.

1 Open the visit

Then  → **Conveyance Entry**.

2 Enter from, to, distance and how you travelled

Karma works out the amount at **Rs. 3 per kilometre**.

3 Add a comment if the journey needs explaining, then save

For a season ticket or travel pass use **Add Pass** instead — pass type, the dates it covers, and the amount.

DO NOT CLAIM TWICE

A small **CE** chip on a visit in your Call Booking list means a travel claim is already attached to it.

CHECKING WHAT YOU HAVE CLAIMED

Menu (≡) → **Operations** → **Conveyance**. Pick a month and you get every claim — date, from, remark and amount — with the month's total at the top.

Raise a lead

The Lead screen

If a customer shows interest in something new, raise a **lead** — best done while you are still sitting with them.

1 In the visit, open $\vee \rightarrow$ **Create Lead**

Or tap **+** on the Lead screen later.

2 Fill in who and what

Company, contact name and number, city, where the lead came from, and what they are interested in.

3 Save

The Lead screen opens on **Received** — leads passed to you. Start with the **Untouched** tile: nobody has picked those up yet.

CREATE LEAD IS MISSING FROM SOME VISITS

It only appears in the $\vee$ menu when the booking has a **Tally serial number** on it. Without one, raise the lead from the Lead screen instead.

Where to go for everything else

A problem for another Antra team

Menu $\rightarrow$ [Antra Ticket System](#)

Tracking a customer's ticket

Menu $\rightarrow$ [Ticket Status](#)

A formal, tracked complaint

Menu $\rightarrow$ [Raise Escalation](#)

Leave, travel claims, your target

Menu $\rightarrow$ [Operations](#)

A colleague's phone number

Menu $\rightarrow$ [Contact List](#)

Product details and brochures

Menu $\rightarrow$ [Products](#)

If something goes wrong

WHAT YOU SEE

WHAT TO DO

Home screen spins forever	Your target is probably not set for the period. Pull down to refresh once, then ask your reporting manager. Not a phone problem.
“Slow internet connection. Please wait...”	Karma is still waiting on the server. Move somewhere with better signal. Do not tap Save twice — nothing is lost.
“Please Update Your App”	Menu → Update App (Android). Nothing loads until you do.
“Cannot login in this device”	Your account is tied to a different handset. Your reporting manager must release it.
Check In does nothing	Location permission is off. Turn it on in phone Settings under Karma, then reopen the visit.
“You can only do check in/out for today’s call”	The visit is not dated today. Only a team lead can fix the times by hand.
“CheckIn / CheckOut Entry is must to be add Support Entry!”	You need both a check-in and a check-out before you can write up the visit. Complete the missing one.
The figures look like someone else’s	Check the User selector at the top of the home screen — it stays on whoever was last picked. Sign out and back in to reset it.
A saved record looks cut off	Check whether the text contained & , # or + . Re-enter it without them.
Blank screen, or “Couldn’t load data”	Tap Retry . If it keeps happening, report it with the four things below.

WHEN YOU REPORT A PROBLEM, ALWAYS SEND THESE FOUR THINGS

1. The screen name from the top bar. **2.** Your app version, from the bottom of the menu. **3.** The customer, ticket number or date involved. **4.** A screenshot.

Everything else — targets, leave, opportunities, escalations, Antra Golden Hour — is in the full **Karma User Manual**. You do not need it to start work.
